

# Prospect Machine Products

A Contract Manufacturer of Deep Draw Metal Stampings

---

## Capability Statement

Prospect Machine Products is a contract manufacturer of deep draw metal stampings used in numerous commercial sectors including builders hardware, plumbing and HVAC, sealing technologies, medical devices, needle and ball bearings, appliance controls, and automotive.

### Core Capabilities:

- Tool and die making
- Transfer press technology
- Quality assurance, ISO 9001:2015
- Fully integrated software platform for business management

### Major Services:

- High volume component production in a range of metals in strip form
- Complete tool room capabilities
- An established supply chain for plating, parts cleaning, heat treating, specialty packaging, and mechanical secondary operations

### Differentiators:

- We offer quick and flexible responses to changes in our customers' demand
- We provide full access to our engineers and tool and die makers for assistance with new designs, design revisions, and tooling processes
- We benchmark our progress in planning, preparation, and tooling development with our customers to ensure a successful product launch
- We propose cost savings through deep draw metal stamping versus other types of metal fabrication
